Onduline is lightweight roofing solution ideal for both houses and outbuildings it features a unique technology that combines cellulosic fibers and selected bitumen and can be installed over plywood or an existing roof.

Onduline is a lightweight roofing solution ideal for both houses and outbuildings. It features a unique technology that combines cellulosic fibres and selected bitumen for better waterproofing performance.

Homeowners appreciate ONDULINE ROOFING SYSTEMS for their multiple advantages:

- Bitumen sheets and associated roofing accessories are extremely lightweight (about 3 kg/sqm), making them fast and easy to install.
- Onduline is guaranteed for its waterproofing performance.
 Onduline roofs are proven to withstand strong winds (up to 260 km/h).
- In warm weather, the material helps to maintain a comfortable temperature inside the building, while composite fibres aid noise reduction, especially during heavy rain.
- Onduline corrugated bitumen sheets and associated accessories are also respectful of the environment and contain at least 50% of recycled content.
